

# Rahul B U

Senior Software Engineer | Backend, Search & GenAI

📍 Bengaluru, India    [in linkedin.com/in/rahulbu](https://www.linkedin.com/in/rahulbu)

## Profile

Senior software engineer with 6+ years across large-scale backend and search, and ~1.5 years building production Generative AI. Currently building Tellius's GenAI analytics assistant: multi-agent systems that turn natural language into SQL, insights, and interactive applications. Proven track record owning systems end-to-end, leading teams, and shipping AI that works in production.

## Skills

- **Languages & Frameworks** — Java, Python, Scala, PHP, Spring Boot, Symfony, Akka
- **AI / GenAI** — LangGraph, LangChain, Multi-agent Systems, Text-to-SQL, RAG, LangSmith, Anthropic Claude, OpenAI, Gemini, AWS Bedrock
- **Datastores & Search** — Elasticsearch, PostgreSQL, MySQL, DynamoDB, Redis, ClickHouse, Chroma / Qdrant
- **Cloud & Tools** — AWS, Docker, Kubernetes, Maven, Retool, Kibana, New Relic

## Professional Experience

### Tellius India Private Limited

#### Senior Software Engineer

Jul 2025 – Present | Bengaluru

- Build and own major subsystems of Tellius's GenAI analytics assistant — a Python multi-agent system (LangGraph) that turns natural language into SQL, insights, and interactive applications.
- Own an agentic system that generates interactive, editable data applications (React/TSX) from a natural-language prompt, with an automated build → validate → fix loop, versioning, and diff-based edits to cut LLM cost.
- Designed the Text-to-SQL and semantic query layers (multi-step reasoning, clarification, execution-retry, ClickHouse); reduced query latency ~30% via context optimization and caching.
- Built a provider-agnostic multi-LLM abstraction (Claude, OpenAI, Gemini, Bedrock) and real-time voice AI agents (Deepgram, ElevenLabs/WebRTC, OpenAI Realtime).

#### Software Engineer 2

Dec 2024 – Jun 2025 | Bengaluru

- Built the agentic Deep Insights pipeline (LangGraph): multi-step intent → generation → validation → summary → follow-up analysis over large datasets.
- Built the foundation of the multi-LLM abstraction with real-time config reload; partnered with product and data science to improve AI reasoning quality.

### Practo Technologies Pvt Ltd

#### Lead Software Engineer

Jul 2024 – Nov 2024 | Bengaluru

- Led the consumer backend team (4 engineers) owning search, listings, growth, and content services; mentored interns. Led the edge/CDN migration from Cloudflare to Akamai.

#### Senior Software Engineer

Aug 2023 – Jun 2024 | Bengaluru

- Replaced heuristic listing ranking with ML learning-to-rank (Elasticsearch LTR + ML models); launched Practo Listings & Profiles in the UAE; built Practo's first patient-facing GenAI chat (Azure OpenAI).

#### Software Engineer 2

Jul 2021 – Jul 2023 | Bengaluru

- Owned the doctor-listing ranking algorithm (hyperlocal signals, distance/availability bucketisation, configurable weights). Built the surgery billing system (Spring Boot) for the new secondary-care vertical — to production in ~10 days.

#### Software Engineer 1

Jul 2020 – Jul 2021 | Bengaluru

- Built and containerized the search indexing service (Spring Boot, Elasticsearch) with real-time event-based sync; migrated autocomplete from Lucene to Elasticsearch. Shipped teleconsultation features (video, IVR) during the COVID surge.

## Awards

**Hackathon Winner**, Tellius

2025

**Value Champ Award & Ace Award**, Practo Technologies — for consistent excellence, ownership, and delivery on critical projects

2022

## Education

**Bachelor of Engineering in Computer Science** — 8.3 CGPA, Visvesvaraya Technological University

2016 – 2020 | Bengaluru
